DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

<u>Species</u>	<u>Claims</u>	<u>Figures</u>
I	1 & 2	3 & 4
II	3	5 & 6
III	4	7
IV	5	8 & 9
V	6	10

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. During a telephone conversation with Mr. Michael Dixon (Reg. No. 37,815) on March 14, 2005 a provisional election was made without traverse to prosecute the invention of I, claims 1 & 2. Affirmation of this election must be made by applicant in replying to this Office action. Claims 3-6 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided

by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Dixon on March 14, 2005.

The application has been amended as follows:

Cancel claims 3-6.

Allowable Subject Matter

5. Claims 1 and 2 have been allowed.
6. The following is an examiner's statement of reasons for allowance:

As to claim 1, patentability resides, at least in part, in the combination of: a method for mistake-proofing a manufacturing assembly process, including the steps of, identifying high risk priority number processes from a PFMEA study, developing a mistake-proofing strategy, defining a work station configuration as to station layout, tool location, and part location, identifying and procuring need hardware, installing and configuring hardware components and programming appropriate PLC logic, utilizing a control parts, defining individual actions, defining error messages, establishing an affectivity date, storing the information for hardware addresses, and re-utilizing and combining actions, in further combination with the other limitations of the claim.

As to claim 2, patentability resides, in a system for mistake-proofing a manufacturing assembly process, using the claimed method.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chandler et al., Mammoser et al., Caputo et al., Hill et al., Guinta et al., and Fisher et al. disclose related art.
